

## Indiana State Police

How do I get road closure information?

- Go to the Indiana State Police Website and click on Road and Weather and then click on Road Conditions. The road closings should be updated every 4 hours.

What is the Indiana State Police response?

- Extra Troopers have been called in throughout the State to deliver food, and water, traffic control, foot patrol in some areas, and providing search and rescue operations. Citizens can call their local State Police Posts for vital information as needed. They should **not** call just for weather and road information. Citizens should be cognizant to leave phone lines open unless they have an immediate concern. They should still dial 911 for an emergency.
